

# Parametric Managed Corporate Portfolios

STRATEGY OVERVIEW | 2025

## Investment Objective

Seek to outperform benchmark while providing income and capital preservation

## Investment Philosophy

- Seek to maximize income and preserve capital
- The strategy combines top-down and bottom up analysis that drives security selection

## Investment Process

- Invest in investment grade corporate bonds
- Bottom-up process selects securities on variables including, but not limited to, credit fundamentals, liquidity, and call features

## Active Management

- Value added through active management with relative value trades, new issue premium, tactical positioning, and fundamental credit research

## Why Parametric Managed Corporates?

- Invest in high quality, liquid, high coupon securities
- Value add portfolio management, with an emphasis on high income securities
- Seek to solve for client income needs while outperforming benchmark

### Additional highlights

- Duration: Short
- Minimum Investment: \$250,000
- Credit Quality: Invest in securities with a minimum rating limit of BBB-
- Relative value trading: Seek relative value across sector, ratings band, and at issuer level
- Annual Turnover: 30 - 50%

<sup>1</sup>Ratings are based on Moody's, S&P or Fitch, as applicable. Credit ratings are based largely on the ratings agency's investment analysis at the time of rating, and the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition. The rating assigned to a security by a ratings agency does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in the security. If securities are rated differently by the ratings agencies, the higher rating is applied. Ratings of BBB or higher by Standard and Poor's or Fitch (Baa or higher by Moody's) are considered to be investment-grade quality.

## Parametric Difference

### PERSONALIZED PORTFOLIOS

A wide range of customization options allows for a targeted allocation to match each individual client's risk-and-return profile.

### ADVANCED TECHNOLOGY

Parametric's proprietary technology efficiently identifies the most attractive securities and optimizes the overall bond investing process.

### TAX EFFICIENCY

We aim for enhanced after-tax returns through our differentiated year-round tax-loss harvesting, which focuses on minimizing transaction costs and cash drag.

### EXCEPTIONAL CLIENT SERVICE

Direct access to the portfolio management team helps keep investors and advisors connected and on top of market insights and recommendations.

The information represents how the investment team generally applies their investment processes under normal market conditions. Diversification does not eliminate the possibility of loss. All investments are subject to risk.

Parametric Portfolio Associates LLC ("Parametric"), headquartered in Seattle, is registered as an investment advisor with the Securities and Exchange Commission under the Investment Advisors Act of 1940. Parametric is a leading global asset management firm, providing investment strategies and customized exposure management directly to institutional investors and indirectly to individual investors through financial intermediaries. Parametric offers a variety of rules-based investment strategies, including alpha-seeking equity, fixed-income, alternative and options strategies. Parametric also offers implementation services, including customized equity, traditional overlay and centralized portfolio management. Parametric is an affiliate of Morgan Stanley Investment Management, the asset management division of Morgan Stanley, and offers these capabilities through offices located in Seattle, Boston, Minneapolis, New York City, and Westport, Connecticut. This material may not be forwarded or reproduced, in whole or in part, without the written consent of Parametric. Parametric and its affiliates are not responsible for its use by other parties.

This information is intended for informational purposes and details investment strategies and opportunities identified by Parametric. Opinions and estimates offered constitute our judgment and are subject to change without notice, as are statements of financial market trends, which are based on current market conditions. We believe the information provided here is reliable, but do not warrant its accuracy or completeness. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The views and strategies described may not be suitable for all investors. Past performance is not indicative of future results. Investing entails risks and there can be no assurance that Parametric will achieve profits or avoid incurring losses. Parametric and Morgan Stanley do not provide legal, tax or accounting advice or services. Clients should consult with their own tax or legal advisor prior to entering into any transaction or strategy described herein. Additional information is available on request.

An imbalance in supply and demand in the municipal market may result in valuation uncertainties and greater volatility, less liquidity, widening credit spreads and a lack of price transparency in the market. There generally is limited public information about municipal issuers. As interest rates rise, the value of certain income investments is likely to decline. Longer-term bonds typically are more

sensitive to interest-rate changes than shorter-term bonds. Investments in income securities may be affected by changes in the creditworthiness of the issuer and are subject to the risk of nonpayment of principal and interest. The value of income securities also may decline because of real or perceived concerns about the issuer's ability to make principal and interest payments. There is no assurance that a separately managed account ("SMA") will achieve its investment objective. SMAs are subject to market risk, which is the possibility that the market values of the securities in an account will decline and that the value of the securities may therefore be less than what you paid for them. Market values can change daily due to economic and other events (e.g. natural disasters, health crises, terrorism, conflicts and social unrest) that affect markets, countries, companies or governments. It is difficult to predict the timing, duration, and potential adverse effects (e.g. portfolio liquidity) of events. Accordingly, you can lose money investing in an SMA. Investment strategies that seek to enhance after-tax performance may be unable to fully realize strategic gains or harvest losses due to various factors. Market conditions may limit the ability to generate tax losses. Tax-loss harvesting involves the risks that the new investment could perform worse than the original investment and that transaction costs could offset the tax benefit. Also, a tax-managed strategy may cause a client portfolio to hold a security in order to achieve more favorable tax treatment or to sell a security in order to create tax losses. Prospective investors should consult with a tax or legal advisor before making any investment decision.
